

B06

The Evolution of High-Speed

The EVO® panel family escalates scalability and density to future-proof today's data center environment.

Features

- High density chassis with 14 slots in 2U or 5 slots in 1U
- Built-in and pre-installed wire management capabilities
- Flexible cassettes and feed-through plate options

Applications

- Data center migration
- Upgrading from 10G and 40G to 100G and 120G
- Fiber connectivity for telecom
