

Connect for Life™

A Wire to Wire Connection

EXO aggregates connectivity in a data center for fiber (LC, MTP) and copper connections, all in the same 1RU modular chassis.

Features

- Each modular cassette connects 3x3 QSFP+ ports for a total of up to 12x12 QSFP+ ports
- Front and rear access to the rack-mounted hub
- Front door opens 180° to reveal labels for cable routing information

Applications

- Data center migration
- SME (small and medium enterprise)
- Connections in 1-3 adjacent racks
